

Paradis d'Enfants

« Paradis d'Enfants » is a non-profit Primary School supported by the community.

Founded in 1997 by the Friends of the Public School Association with only 33 students from low income families, today, it boasts **1500 students** with schools in three locations.

« Paradis d'Enfants » was created to serve the cause of children and to morally and financially support parents in distress unable to pay for quality education for their children.

Since the founding of « Paradis d'Enfants », years ago, we have come to realize that, in addition to the education of young people and the financial and moral support provided to our children's families, it is the positive impact on civil society and the implications of the local community that are the real result of our work.

The mission of « Paradis d'Enfants » is unique in Lebanon. Our students receive a high quality scientific and academic education in three languages: Arabic, French and English. In addition we provide a civic education in which the culture of everyday respect for others, national pride and responsible citizenship are emphasized.

Our children are tomorrow's leaders.

By supporting the education of underprivileged children,

« Paradis d'Enfants » aims to raise our community's most vulnerable people to tackle the difficulties of modern life. We are teaching these children today, but our goal is to guide them in building their future, to realize their dreams and to aspire to a career in which they will feel pride and commitment. Our main objective is:

The right to a quality education for every Lebanese child in need.
